CPL
CHEMISTRY AND PHYSICS OF LIPIDS

Volume contents

Volume 81 (1996)

E. Ziomek, I. Douchet, M. Ivanova, R. Verger (Canada; Bulgaria; France) *Interaction of a poly(dimethylsiloxane) with triglycerides in monomolecular films and application to lipase kinetics* 1
T. Ioneda, S.S. Ono (Brazil) *Chromatographic and mass spectrometric analyses of 1-monomycoloyl glycerol fraction from Rhodococcus lentifragmentus as per-O-benzoyl derivatives*. 11
A. Winter, W.-P. Ulrich, F. Wetterich, U. Weller, H.-J. Galla (Germany) *Gangliosides in phospholipid bilayer membranes: interaction with tetanus toxin*. 21
V.V. Chupin, O.V. Ostapenko, V.N. Klykov, M.V. Anikin, G.A. Serebrennikova (Russia) *On the synthesis of platelet-activating factor via acetylation of 1-alkyl-sn-glycero-3-phosphocholine. Formation of structural isomer of PAF in the presence of bases*. 35
L.I. Viera, G.A. Senisterra, E.A. Disalvo (Argentina) *Changes in the optical properties of liposome dispersions in relation to the interlamellar distance and solute interaction* 45
M.S.F. Lie Ken Jie, C.K. Lam (Hong Kong) *Regiospecific oxidation of unsaturated fatty esters with palladium(II) chloride/p-benzoquinone: a sonochemical approach* 55
C. Scheick, G. Spiteller (Germany) *Genesis and metabolisation of 1-pentene during lipid peroxidation of ω-6 unsaturated fatty acids: metabolism of 1-pentene* 63
P. Mattjus, J.P. Slotte (Finland) *Does cholesterol discriminate between sphingomyelin and phosphatidylcholine in mixed monolayers containing both phospholipids* 69
O.W. Howarth, G. Vlahov (UK; Italy) *^{13}C Nuclear magnetic resonance study of cyclopropenoid triacylglycerols* 81
I.V. Grechishnikova, L.B.-Å. Johansson, J.G. Molotkovsky (Russia; Sweden) *Synthesis of new bifluorophoric probes adapted to studies of donor-donor electronic energy transfer in lipid systems*. 87

Announcement 99

Preface 101

K. Gawrisch, L.L. Holte (Rockville MD) *NMR investigations of non-lamellar phase promoters in the lamellar phase state* 105
T.J. McIntosh (Durham, NC) *Hydration properties of lamellar and non-lamellar phases of phosphatidylcholine and phosphatidylethanolamine* 117
N. Janes (Philadelphia, PA) *Curvature stress and polymorphism in membranes* 133
P.K.J. Kinnunen (Helsinki, Finland) *On the molecular-level mechanisms of peripheral protein–membrane interactions induced by lipids forming inverted non-lamellar phases*. 151
K. Lohner (Graz, Austria) *Is the high propensity of ethanolamine plasmalogens to form non-lamellar lipid structures manifested in the properties of biomembranes?* 167

C.D. Stubbs, S.J. Slater (Philadelphia, PA) *The effects of non-lamellar forming lipids on membrane protein-lipid interactions* 185
F.Y. Yang, F. Hwang (Beijing, China) *Effect of non-bilayer lipids on the activity of membrane enzymes* 197
L. Chernomordik (Bethesda, MD) *Non-bilayer lipids and biological fusion intermediates*. 203
R.B. Cornell, R.S. Arnold (Burnaby, Canada) *Modulation of the activities of enzymes of membrane lipid metabolism by non-bilayer-forming lipids* 215
J. Wegener, H.-J. Galla (Münster, Germany) *The role of non-lamellar lipid structures in the formation of tight junctions*. 229
